

MCW-10

Mini Check Weigher

Applications:

Used for automatic weight detection and upper and lower limit discrimination on various packaging machines and logistics conveyor systems, and can also be used for products. Detection of multiple and missing parts after packaging. It is widely used in online testing in the pharmaceutical, food, toy, hardware, chemical and other industries. In addition, it can directly replace manual weighing to improve production efficiency, consistency and reliability of weighing.

Technical Details:

- | | |
|-----------------|---------------------------------|
| • Accuracy | ±0.1g (Depends on products) |
| • Speed | 45pcs/min (Depends on products) |
| • Power Supply | AC220V 50-60HZ |
| • Power | About 100W |
| • Platform Size | 250*150mm |
| • Weight | About 15KG |
